<i>The Daimler-Benz DB 601 was a German aircraft engine built during World War II. It was a liquid-cooled inverted V12, and powered the Messerschmitt Bf 109, Messerschmitt Bf 110, and many others. Approximately 19,000 601's were produced before it was replaced by the improved Daimler-Benz DB 605 in 1942.</i>

<span><span></span></span> <span><b>Daimler-Benz DB 601</b>—Wikipedia</span>
<span></span> <div>The DB 601 was the world's first production engine with direct gasoline injection. The fuel/air mixture was not produced in a carburetor, as was customary at the time, but directly in the cylinder, thereby boosting output. In 1939, a Me 209 with such an engine reached a speed of 469<span> </span>mph – a record that remained unbroken for 30 years.</div>
<div><div><span></span></div><b>Legend 3: Mercedes-Benz DB 601 A aircraft engine.</b></div>
<div><div><span></span></div><span>Image from Wikipedia article Daimler-Benz DB 601. The Daimler-Benz DB 600 series, were 12-cylinder, liquid cooled, inverted Vee engines, designed to be right from the very first start. The original engine displacement was 2,069 cu in (33.9L) and utilized direct fuel-injection. German industry was the leader in direct fuel-injection 1 and this gave the Messerschmitt Bf 109 a major advantage over the Supermarine Spitfire.</span></div>

<div><div><span></span></div><span>The Daimler-Benz DB 601 was a German aircraft engine built during World War II. It was a liquid-cooled inverted V12, and powered the Messerschmitt Bf 110, and many others. Approximately 19,000 601's were produced before it was replaced by the improved Daimler-Benz DB 605 in 1942.</span></div>
<div><div><span></span></div><span>Daimler-Benz DB 601 A aero engine, 12-cylinder V-engine with gasoline injection, 1937 Initially, the company recruited women in order to cope with the required unit volumes. However, as staff numbers were still too low, Daimler-Benz also used forced labourers.</span></div>
<div><div><span></span></div><span>Image from Wikipedia article Daimler-Benz DB 601. The Daimler-Benz DB 600 series, were 12-cylinder, liquid cooled, inverted Vee engines, designed to be right from the very first start. The original engine displacement was 2,069 cu in (33.9L) and utilized direct fuel-injection. German industry was the leader in direct fuel-injection 1 and this gave the Messerschmitt Bf 109 a major advantage over the Supermarine Spitfire.</span></div>
