Melanie Klein: The Basics

Melanie Klein has described the earliest stages of infantile psychic life in terms of a successful completion of development through certain positions. A position, for Klein, is a set of psychic functions that correspond to a given phase of development, always appearing during the first year of life, but which are present at all times thereafter and

can be reactivated at any time.

Paranoid-schizoid and depressive positions - Wikipedia

Melanie Klein first wrote about the Depressive Position in 1935. It is a term that she uses to describe the developmental stage that occurs in an infant's first year, after the primal Paranoid-Schizoid Position. She called these two states of mind 'positions' rather than 'stages', ...
