Schneider says that the most common rebuttal to flat-rate billing he encounters is the false belief that as soon as a service shop starts flat-rating jobs, quality takes a dive. The idea is that a tech who is only interested in making his numbers look good and beating the flat-rate is more likely to take shortcuts than a technician who doesn't have incentive to do the job quickly.

Just read your "honesty is the best policy" column and heartily agree with it... however, would you please address the use of Flat rate manuals to bill for the time it will take to accomplish 'every conceivable repair' for each make and model automobile. The manuals list the repair time billable by tenths of an hour. For example, replacing front struts on a particular model will be ...
